Lival is committed to sustainability and to drive streamlined processes which cost effectively produce high quality products. We do this in compliance with laws and regulations as well as relevant standards.

Sustainability – the economic, environmental and social - continual improvement

**Economic**

Lival is an economically solid family company - successful in its branch. To achieve sustainable competitiveness in today’s rapidly changing world, requires flexibility, immediate readiness to adjust and hard work.

Some basic principles:
- paying taxes to the community
- excellence performance and high quality products.
- assessing risks and opportunities in all business operations
- valuing stakeholder views

**Environment - Climate change**

**No waste water into the sea**

As Lival Pikkala facilities are located on the coast of the Finnish Gulf it is essential that no waste water is lead to the sea. The industrial process water in Sipoo factories is free from phosphates.

**Circular economy**

Our processes are efficient and using sparingly resources. All waste at Lival is circulated to new raw materials or energy. No waste is dumped.

**Climate change**

Lival has almost halved CO2 emissions (CO2 t/revenue, Pikkala) during the last years due to new processes and product portfolio. Lival reports its climate change impact into the global CDP – disclosure system.

**Social**

Lival’s principles for social responsibility are presented in the Ethical Code of Conduct. Lival has for more than 20 years applied the SA 8000 standard as a framework for responsible practices.

Lival’s health and safety management is based on the insurance company Fennia’s comprehensive operating concept for occupational health and safety, the Safe Company -services (Turvallinen Yritys -palvelut).

**Corporate Citizenship**

Lival supports a number of projects e.g. Baltic Sea environmental project, cancer research and cultural activities among others for persons suffering from dementia.
